Dear Mr. Mayor and Council, Bowen Island Municipality.

Thank you for your work to bring to our attention the issue of timber sales on our beloved Island. As a resident of over 25 years, I am very upset about the vast change the removal of trees from 28% of land will have on we humans and the biosphere the plants, animals, and birds abound in.

Please continue to do all you can to halt the removal of trees. It will have an anticipated effect of upsetting the quiet our island, increasing traffic on our roads and ferry, and of course changing the landscape forever.

For our home one of the lots is too close for comfort; we would have to leave our wooded home for a living space that would put us back into forest. I know most of my fellow-residents feel the same way.

Thanks for your help to preserve what we've all come here to enjoy.
